Quality and expertise based on tradition ...

When August Bruns established our family business in August 1948, he laid the foundation for a company that would enjoy continuous success to the present day. We have grown steadily in the more than 60 years we have been in business. And as always, the range of our products continues to reflect the needs of our customers. We work exclusively with such internationally leading manufacturers as CNH and KUHN, manufacturers you can rely on – now and for many years to come.

Today we are an internationally active company managed by Walter and Andreas Bruns. With locations in Cloppenburg, Bösel, Lindern, Aurich, Rhede, Langenstein, Klein Bünzow and Haren, we offer the advantage of close proximity to our customers whose many and varied needs we are able to meet in all respects.

From the very beginning we have remained true to the high standards we set for ourselves. We make no compromises when it comes to the quality of the equipment we produce and sell. Our products and services are subject to rigorous monitoring for compliance with the most advanced standards. No machine will ever leave our shop without the required **"BRUNS FINAL INSPECTION"**.

Our managing partners
Walter and Andreas Bruns

A supremely motivated team

We owe our success to our supremely qualified and highly motivated team. More than 160 skilled employees work for us. The BRUNS Group as a whole employs more than 330 people. Whether it's our agricultural machinery mechanics, metal workers, and logistics experts or our replacement parts service, maintenance, and consulting staffs – every one of our employees is a highly-trained specialist in his field.

Training and expertise

Training and ongoing professional development have traditionally played an important role for us. Over the decades we have trained more than 400 young men and women for a wide range of occupations – from agricultural and construction equipment mechanic, warehouse logistician, office clerk, and wholesale & export trade specialist to IT systems consultant. All employees are regularly trained and receive further occupational training. Bruns also invests heavily in advanced training for our more than 50 service mechanics. It goes without saying that all of our mechanics are equipped with the most advanced tools, electronic data processing technology, diagnostic equipment, and a fleet of vehicles.

Always at work for you

As a provider of services to the customer, we know how important dependable service and competent advice are. That's why we are available whenever and wherever you need

Another indication of the strength of our team and tractors: In 2007 and 2008 BRUNS was the German tractor-pulling champion in its class.

... the company headquarters in Cloppenburg

our assistance – over the phone, on-site, or in one of our many local branches. Whether you need fast replacement parts delivery, competent training, on-site technical assistance, or an in-depth consultation, you can always expect experience, expertise, and prompt assistance from us. With our fleet of some 20 vehicles, we can be on-site in no time if worse comes to worst. We can be reached through our emergency hotline around the clock: 365 days a year.

Top used vehicles and equipment from Bruns

We are also your best source for used vehicles and agricultural machinery. We always offer a wide selection to choose from.

As a dependable full-service provider, we can also give you financing advice for your powerful used tractor, agricultural machine, or other equipment. It goes without saying that we offer nothing but top-quality, first-class products when it comes to used equipment as well.

Simply drop in or visit our homepage. Our trucks are on the road more than 300 days a year for you, the customer. In addition, we are assisted on a daily basis by local agricultural machinery logisticians.

Used items: Approx. 150 used tractors and more than 40 combines/shredders, including new rental returns, are always in stock.

The BRUNS advantages at a glance:

- ▶ We work with world market leaders
- ▶ Location density with 7 branches in your vicinity
- ▶ 20 service vehicles for prompt assistance
- ▶ More than 60 years of experience as a harvest partner
- ▶ Thorough warehousing and regional warehouse for New Holland
- ▶ Top quality with a dealer's guarantee
- ▶ Rental service
- ▶ Our own financing bank for used machines – very flexible
- ▶ Guarantee extension for used machines

Replacement parts in the blink of an eye

Whether old or new – the service is right.

We are your one-stop source for all services, from dependable delivery of the most advanced agricultural machinery and equipment to our replacement parts and maintenance services.

Farmers, private contractors, and industries seeking knowledgeable assistance all come to us. From tractors to combines, we can provide you with the entire gamut of powerful agricultural machinery.

With more than 30,000 single items always on hand, a high availability rate is our strength.

We stock more than 30,000 single items in our replacement parts warehouses at all times. This enables us to supply you with components quickly and without delay whenever you need them. And if we don't have the part you need, we will find it for you, if necessary within a few hours. BRUNS Cloppenburg and Klein Bünzow are the regional warehouses for the dealers in their districts.

In addition, CNH has offered its "TOP Service" since 2007. A needed replacement part will be procured within 24 hours, regardless of where it is and the cost of delivering it, whether by air, taxi, or other means. ...

We are available for emergency assistance 24 hours a day. BRUNS customers have greatly appreciated this special harvest service for years. And that's not going to change.

Our service hotlines

Workshop: 00 49 1 70/2 80 14 81

Replacement parts: 00 49 1 72/6 40 34 15

If you are not completely satisfied with the service you receive, our warehouse management staff under Reinhold Hilgefort will address your concerns.

Top-of-the-line construction equipment from Bruns. *New!* New Holland Construction – 235 years of experience

The most advanced machines and innovative engineering

As one of Germany's premier dealers in agricultural machinery, we also sell the most up-to-date construction equipment from the well-known company New Holland Construction.

New Holland Construction is an internationally successful manufacturer that brings recognised specialists and strong regional brands under one roof. The merger of the respected manufacturers Fiat Hitachi, Kobelco, O&K, and New Holland Construction has turned 235 years of experience in the development of construction equipment into a world brand. NEW HOLLAND CONSTRUCTION.

The company enjoys an outstanding reputation the world over. Its name stands for superior performance and comprehensive service.

Ask about our rental offers:

- ▶ Telehandlers 112-125 hp 7-17m
- ▶ Loaders 65-196 hp and up to 16 tons
- ▶ Mini excavators

A pioneer in product selection

The experienced and reliable provider New Holland has inherited special capabilities from each of its predecessor companies: the technology of Fiat Kobelco, the world's specialist for crawler excavators; the flair for innovation with which O&K has made its reputation; the quality of the smaller equipment from New Holland Construction; and of course the worldwide familiarity of the name New Holland. Our company combines the most important strengths of these well-known names.

New Holland offers both proven branded products for the construction industry and an ideal dealer service.

Our Bösel location

26219 Bösel

Friesoyther Straße 14
Tel.: 00 49 4494/9292 - 0
Fax: 00 49 4494/9292-29
boesel@abc-bruns.de

Employees 15, service supervisor B. Stärk (far right)

Our branch manager, Norbert Rohlfer

A tradition to uphold

The Bösel location has belonged to the Bruns group since 1965. In 2002 the company building, including its administrative, workshop, and showroom wings, was completely remodelled and redeveloped.

In Bösel we offer our entire product portfolio of new and used agricultural equipment. Long-time employee Norbert Rohlfer has managed the location since 2006.

Variety is our advantage

The team working under service supervisor B. Stärk has developed into absolute all-rounders in the BRUNS group of companies. Now more than ever they are at home in grassland dairy farming in the northern border area, in land cultivation in the central area.

In everything from large tractors to grassland equipment, combines, presses, trailers, and modern land cultivation, they have developed into versatile specialists who can be relied upon for quality and fast, competent service.

"A strong team – we put the EMPHASIS on SERVICE:" G. Hempen (RP), N. Rohlfer (sales), T. Kuhl (RP), M. Helmers (admin.)

Our branch manager
Jürgen Janzen

Dependability is our strength.

Some 20 staff members are on hand in Aurich to answer all of your questions regarding agricultural equipment.

The location traces its roots back to the year 1956, when Martin Reents established Martin Reents Landmaschinen GmbH. The company moved to the new location on Borsigstrasse in 1996 and operated thereafter under the management of the Mager & Wedemeier group until 2002. As the independent company Martin Reents GmbH it was acquired by BRUNS in 2002. Since then it has been the point of contact for the agricultural concerns of East Frisia. In 2007 the company was renamed and merged with August Bruns Landmaschinen GmbH in Cloppenburg.

A familiar name in East Frisia

Our 8,000 square metre site affords us plenty of room for the agricultural equipment we have on display, our superbly equipped workshop, and our large replacement parts warehouse which carries a particularly large stock of parts for CASE and Kuhn grassland equipment. The replacement parts team is well-known throughout the country for its expertise and willingness provide information.

Aurich is therefore the ideal location from which to serve our customers in East Frisia. In addition to vehicles and equipment from New Holland, Kuhn, and Case, you will also find here products manufactured by Westfalia Melktechnik, Trioliet Futtertechnik, and Vico Erntetechnik, all under one roof.

Bruns Aurich is the CASE specialist for the BRUNS group.

rhede@abc-bruns.de

Team and service supervisor J. Grimm

Our branch manager
Ingfried Freseman

BRUNS agricultural machinery has a home once again in Rhede-Brual.

BRUNS Landmaschinen in Cloppenburg acquired the former Deutz dealer EVERS Landtechnik, which now serves the northern Emsland and Rheidern districts with main brands New Holland and KUHN.

BRUNS Cloppenburg took over the entire company headquarters of former Deutz dealer EVERS Landtechnik in early 2008, closing a gap in the BRUNS sales and service network. From this location BRUNS now also offers its main brands New Holland and Kuhn. The new Rhede location is conveniently situated on the A 31, putting it within easy reach of all points from Leer to Meppen. Even the Netherlands are only 3 km away. With further businesses in Aurich and, since April 2008, in Haren-Emmeln on the B70, we now cover the entire axis from the North Sea to deep within the Emsland district. This provides customers in the north and west of the Weser-Ems sales region with optimum service and distribution.

BRUNS is pleased to assure its customers that it will maintain this level of know-how and will remain the premier address for Deutz in the region. BRUNS is also pleased that it is once again able to offer, in an agricultural heartland and in proximity to its customers, hay harvesting equipment by market leader KUHN. The KUHN brand includes products ranging from hay harvesting equipment with reapers, hay rakes, and tedders to feed mixers and tillage equipment with ploughs, seed drills, pneumatic planters, and mulchers. KUHN offers just the right seed-spacing drill equipment as well.

In the field of forage harvesting, BRUNS decided in 2005 to become the exclusive partner of the Strautmann company for the Weser-Ems region.

As one of Germany's top dealers, BRUNS, like EVERS, offers equipment made by Kverneland, a company specialising in the field of ploughing equipment and seed-spacing planters. And now that it carries drum mowers from VICON (soon to be under the name of KUHN), BRUNS has become your new source for grassland equipment as well.

Our Haren-Emmeln location

49733 Haren-Emmeln

Heinrichstraße 5

haren@abc-bruns.de

The Haren service team of workshop supervisor H. Ellermann (far left)

Our branch manager
Andreas Antons

The spraying and potato professionals

After the business opened in 2008, Herbert Ellermann's service team acquired two additional mechanics and an addition to the replacement parts staff.

A newcomer in the Bruns Haren brand family is the Köckerling company of Verl (Westphalia), which offers equipment for everything from light to heavy tillage but is also at home in planting equipment and grassland management. The company also maintains a close relationship with its Dutch partner for spraying equipment built by CHD (A. Eefting). The spraying equipment it offers is brought to the Emsland region and East Frisia exclusively through BRUNS. These machines have a capacity of more than 7,000 litres and a width of 48 m and they come with every convenience. In the realm of potato equipment the company has more than three decades of experience to build upon and works with the Dutch professionals in the MIEDEMA company.

Spacious workshop area with modern equipment

You can depend on us.

In May 2008 BRUNS moved from the old property in Alt-Haren to the new location in Haren-Emmeln. This location was completely renovated – inside and out. It boasts a spacious building with nearly 3,000 square metres of floor space on over 15,000 square metres of land.

June 2008 reopening

The new location is conveniently located on the B 70 with a nearby connection to the A 31 motorway. In addition to expansion of the workshop equipment and of the replacement parts warehouse, additional cars have been acquired for on-site customer assistance. The new branch's sales territory is divided into a northern part (A. Antons), which extends from Haren to Papenburg and a southern part extending to the county of Bentheim (new - R. Tieben). BRUNS currently employs a staff of 14 in Haren.

langenstein@abc-bruns.de

Our branch manager
 Frank Grodrian

Our gem in the Börde region

Our branch in Langenstein – in the Harz district and in direct proximity to the Börde district – is our newest location offering expert on-site customer assistance. This new branch was established in the summer of 2007 on more than 15,500 square metres of land in the heart of the Börde district. The building, which was opened in March 2008, contains more than 2,000 square metres of floor space, including the nearly 1,000 square metre workshop with its 6 workplaces for large machines, a 5-ton craneway, and 3 exit rolling gates.

The building also has an open salesroom with an open storeroom for small parts and, adjacent to the more than 40-metre-long used machine shop, a storeroom for large parts. Parts for harvesters are guaranteed to be in stock or delivered to the location overnight.

The Langenstein team under business manager F. Grodrian is made up of: Horst Stolberg in sales (since 2008); the six-member service team under supervisor J. Ost; and Messrs. Arnecke and Volkmann in the spare parts department. Ms. S. Pfeiffer and M. Grodrian share the administrative duties. Those who look for top-of-the-line harvesting equipment and the service to go with it are in good hands here.

Our Klein Bünzow location

17390 Klein Bünzow

Our branch manager
Theo Thöle

The harvest professionals in Vorpommern (Western Pomerania)

Our Klein Bünzow branch was established in 1994 and was built around the acquisition of a workshop belonging to a former successor business to a collectivised farm. An impressive machine hall was built in 2007 as part of an extensive expansion and modernisation program. We are well equipped for the challenges of tomorrow.

A large selection of the most up-to-date harvesters and numerous rental returns in stock: www.abc-bruns.de

Investment in the future

Since 1994 we have had exclusive selling rights to the New Holland brand for the Eastern Pomerania and Northern Pomerania districts, Rügen, and parts of Ückerrandow and Demmin.

Our primary dealers are the companies Lemke in Trinwillershagen (for parts of Northern Pomerania) and ROTEC (for Rügen). In response to specific regional needs, the Klein Bünzow location specialises in harvesting equipment.

We offer a large selection of the most up-to-date harvesting equipment and large machines. Currently our customers are served in Klein Bünzow by 14 permanent employees and five trainees.

The Lindern team

A strong team

Complementing our permanent in-house team of highly-trained employees are the experienced self-employed engineers who work for us here in Lindern. This further enables us to react to customer requests and current market developments with flexibility and at any time.

Comprehensive service from a single source

The engineering works in Lindern have belonged to the Bruns group since 1980. The location was formerly a forge that had been converted in the mid-1960s into a modern repair and equipment business by its original owner, Clemens Benken. Today modern vehicles with up to three axles and filling capacities of up to 28,000 litres are produced here according to individual customer requests.

That is our strength: reacting with flexibility to customer requests. Currently, up to 600 cutting unit carriages are manufactured per year in Lindern, more than 50% of which are exported.

Far left: L. Horstmann, product manager for cutting unit carriages
2nd from right: B. Holtaus, product manager for liquid manure equipment

Manufacturing according to individual customer request.

Experts in manure spreading

An important focus of our Lindern location is selling innovative equipment and vehicles for efficient liquid manure spreading and lime distribution.

Custom manufacture of belt spreaders with volumes of up to 18,000 litres

A range of innovative products

Our range of products includes everything from modern belt spreaders, which have a capacity of from 5,000 to 18,000 litres, to powerful large-area spreaders and low loaders for transporting large equipment (Transportfix) to modern cutting unit carriages of up to 10.6 m for combine harvesters of all brands.

It is very important to us that all of our equipment meets the latest standards and is optimised for economic efficiency, roadworthiness, and easy handling.

Special vehicle construction: manufacture of tanks for mounting on trucks
